Profile

I am a **Front End Developer** with 1.5 years of professional experience focusing primarily on **React**, **Next.js** and **React Native**. I have passion for building user interfaces both on the web and the mobile platform using React and React Native. I enjoy working on projects that deliver seamless user experiences. I enjoy exploring new tools and technologies in the JavaScript ecosystem to improve my development process. I have a personal blog where I share articles about frontend development.

Experience

Frontend Developer • Comnet Türkiye • Oct 2023 - Feb 2025

I worked on developing user-focused interfaces for both web and mobile platforms using **React** and **Next.js**. My work included building CRM systems and landing pages, leveraging modern technologies such as **TypeScript**, **React Query**, **Zustand**, **TailwindCSS**, and **shadcn** to deliver scalable and high-performance solutions. Additionally, I developed a mobile application with React Native and gained experience with real-time communication solutions based on **WebSocket** technology. I also worked on **CI/CD pipelines** using GitHub Actions to enhance process automation and reliability. These projects allowed me to deepen my technical expertise and practical knowledge while prioritizing user experience in every aspect.

Featured Projects

Ehliyet Rehberi • [App Store](#)

Developed a cross-platform mobile app with **Expo** and React Native that simplifies driving license preparation through interactive exam simulations and essential traffic insights. Utilized **Expo Router** for seamless navigation, **Zustand** for state management, and modern UI libraries (**Nativewind** & **Gluestack UI**) to deliver a responsive, user-centric experience.

[React Native](#) [zustand](#) [Gluestack](#) [TailwindCSS](#)

Storygen • storygen.furkanleba.com - [Github](#)

A **Next.js** app for creating and sharing Instagram Story-style content using **React-Konva**. Stories are saved as JSON in **Cloudflare KV** and auto-expire after 24 hours. It features a custom story editor with a responsive canvas UI.

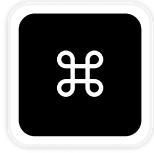

[NextJS 15](#) [React Konva](#) [shadcn](#) [Cloudflare KV](#) [TailwindCSS](#)

Trade In • tradein.furkanleba.com - [Github](#)

A **full-stack** web application that lets users quickly trade in their phones by selecting their device, providing condition details, and receiving an instant offer. It also features an **admin dashboard** for managing trade data.

[Hono](#) [react-i18next](#) [shadcn](#) [TailwindCSS](#) [Cloudflare D1](#) [Drizzle](#)

Next Blog • furkanleba.com - [Github](#)

A modern blog platform built with Next.js 15. Used shadcn for base components, styled with Tailwind CSS, and powered by remark/rehype tools for efficient content management.
