Profile

I am a Front End Developer with 1.5 years of professional experience focusing on React, Next.js and React Native. I have passion for building user interfaces both on the web and the mobile platform using React and React Native. I enjoy working on projects that deliver seamless user experiences. I have a personal blog where I share articles about frontend development. I am eager to take on new challenges to further grow my skills.

Experience

Comnet 2023 October -
I worked on developing user-focused interfaces for both web and mobile platforms using **React** and **Next.js**. My work included building CRM systems and landing pages, leveraging modern technologies such as **TypeScript**, **React Query**, **Zustand**, **TailwindCSS**, and **shadcn** to deliver scalable and high-performance solutions. Additionally, I developed a mobile application with React Native and gained experience with real-time communication solutions based on **WebSocket** technology. I also worked on **CI/CD pipelines** using GitHub Actions to enhance process automation and reliability. These projects allowed me to deepen my technical expertise and practical knowledge while prioritizing user experience in every aspect.

Comnet App | (AppStore) - (Google Play) **Comnet Website** | (url)

Projects

Ant Wallet | (url)
- A full stack spending tracker application where users can save their incomes/expenses and track where their money is being spent.
- Tools: Next.js (App Router), React Context, TailwindCSS, HeadlessUI, React Date Picker

Worday | (url)
- A Twitter inspired platform where users can share single word posts, and others can engage by expressing their appreciation.
- Front End: React, Context, Tailwind.
- Back End: Express.js, Prisma, Redis.

Fastracker | (url)
- A mobile app to track intermittent fasting periods. It has a countdown both for eating and fasting periods and a history view where users can track their progress.
- React Native (TypeScript), Redux Toolkit, Firebase (Cloud Firestore API), Notifee

Memory Game | (url)
- A card matching game with a minimalistic design. User stories are implemented in an organized and maintainable way using Redux.
- Front End: React, Redux, Styled Components

Technical Skills

- **React**
- **Next.js**
- **React Native**
- **Javascript & Typescript**
- **Git**
- **Responsive Web Pages**
- **HTML5 & CSS3**

Certifications

- Frontend Development Libraries - **freeCodeCamp**: See Credential & Projects
- Backend Development Libraries - **freeCodeCamp**: See Credential & Projects
- Javascript Algorithms and Data Structures - **freeCodeCamp**: See Credential & Projects

Education

Istanbul University - Cerrahpasa, *(2018 - 2023)*
English Language Teaching (Bachelor`s Degree)
